

# Laneventure®

## *April 2008 Featured Fabrics* **Rhythmic, Global, Sophisticated**

Below is a sampling of Laneventure's featured fabrics this market from the Excursions Collection:

### **6195-001**

Mill: Craftex

Fiber Content: 100% cotton

Inspired by the hand stitched cloths crafted for centuries by talented needlewomen in Central Asia, this suzani pattern celebrates the everyday folk-art craft. Through repetition of colorful and rhythmic patterns, the suzani shows us another path along the Global trend that is exciting and refreshing. Its imperfections are the perfect counterbalance of today's modern interior. Available to Excursions retailers fall 2008.

### **6203-088**

Mill: Textile Fabric Associates

Fiber Content: 65% Acrylic; 26% Polyester; 9% Rayon

Infusing neutrals with warmth and sophistication, fabrics with unique luster qualities will play prominently in 2008. The featured fabric is a Laneventure market exclusive and achieves its interesting shimmer through a process of printing on top of the fabric. This burnished gold chenille is a stunning example of how simple it is to incorporate metallic effects into the home. Available to Raymond Waites retailers fall 2008.
